EDUCATION

Rensselaer Polytechnic Institute

Bachelor of Science: Computer Science | GPA: 3.6

Troy, NY

May 2025

WORK EXPERIENCE

Zero Sum Defense

Minneapolis, MN (Remote)

Member of Technical Staff

July 2025 - Present

- Built the AWS account provisioning pipeline behind customer signup for the **Actualize** identity platform, replacing a **25-minute** manual setup per account with a **fully hands-off** flow supporting **50+ accounts daily**
- Designed a self-healing drift checker, a weekly **EventBridge** job that reconciles each tenant against its expected state; it caught **200+ misconfigured tenants** on its first run while preserving single-tenancy's blast-radius isolation
- Deployed Actualize across **AWS, GCP, Azure, and Cloudflare**, standardizing multi-cloud infrastructure with **Terraform** modules and automated **CI/CD**
- Shipped production **Rust** on the **Tauri** desktop client, owning packaging of the native binaries behind hardware-token authentication and a build pipeline that catches per-target mismatches at build time instead of on users' machines

IBM

Troy, NY

Software Engineering Intern

Jan 2024 - Aug 2024

- Built an open-source **REST API** for the AWS Identity Store (github.com/Vicguin65/IBM-Identity-Center-API) serving **100+ IBM teams** daily, integrated with IBM Security Verify for single sign-on across identity providers
- Closed a gap in AWS's **SCIM** API by merging its responses with the AWS Identity Store SDK, returning complete user records from one endpoint
- Automated provisioning of an AWS **VPC** and 4 EC2 servers hosting a data science application with **HCP Terraform**, including deployment of application updates

AI Camp

Palo Alto, CA

Software Engineer Intern

May 2022 - Dec 2023

- Led a team of **6 interns** shipping an educational bot with **NVIDIA NeMo** guardrails and **GPT-3.5-turbo**, deployed in **8 courses** reaching **60+ students** each
- Built a **Django** REST API on **PostgreSQL** that grouped **300+ students** into cohorts by survey similarity
- Automated hiring workflows via the Lever API, saving **100+ hours per season**, and put a **scikit-learn** resume classifier trained on 1,700+ records into production

PROJECTS

Who is Tyler Du, Portfolio Site with AI Agent

github.com/Vicguin65/Portfolio-Website

Personal project

Sept 2024 - Present

- React** frontend on a **Terraform**-managed AWS stack (**Lambda**, API Gateway, CloudFront, S3, SES, Route53) with S3-native state locking and a Lambda package that rebuilds automatically when source changes
- FastAPI** endpoint where a **Claude** agent evaluates fit against a pasted job description, grounding on a resume and knowledge base fetched from **S3** at request time, so content updates ship with an upload instead of a redeploy

SKILLS & AWARDS

Languages: Python, Rust, TypeScript, JavaScript, HCL

Cloud & Infrastructure: AWS (Lambda, DynamoDB, EC2, S3, IAM), GCP, Azure, Cloudflare, Terraform, Docker, CI/CD

Frameworks & Tools: React, FastAPI, Django, PostgreSQL, Tauri, Git, Claude Code, Claude API, scikit-learn

Awards & Certifications: National Cyber Scholar with Honors, Microsoft Engagement Program Scholarship, Dean's Honor List; AWS Certified Cloud Practitioner, HashiCorp Terraform Associate, GIAC Foundational Cybersecurity Technologies
